

Stern Gear

Prop shafts, cutless bearings, packing glands, flexible couplings, engine alignment --

these are an integral part of any inboard drivetrain installation, and one which is often neglected!

At G.M.E. we specialize in assessment and repair of stern gear components, including:

- Cutless bearing replacement --- naval brass or fibreglass casing?
- Stuffing box repacking ----- hemp or high tech?
- Flexible couplings ----- necessary or not?
- Engine alignment ----- allowable tolerances ?
- Steady bearing installaton ----- shaft length / bearing spacing?
- Thrust bearing installation ----- matching mounts?
